

Figure 10 is a bar chart showing the FWHM ENC [keV] versus Peaking times (0 to 7). The y-axis represents FWHM ENC [keV] and ranges from 0 to 4.5 with major ticks every 0.5 units. The x-axis represents Peaking times from 0 to 7. For each peaking time, there are multiple data series represented by different colored bars (blue, green, orange, red, purple, etc.). The FWHM ENC values generally increase with peaking time, ranging from approximately 2.2 keV at time 0 to over 3.5 keV at time 7. The bars are grouped by peaking time, and the chart includes a light gray grid.
